

# WOODVISIONS

## EASY CARE FURNITURE PLAN

Cypress Wood has been known as the world's 'wood of choice' for thousands of years. Because of its beauty, natural durability, and broad versatility, its popularity continues today, inside the home as well as outdoors. Cypress wood can be easily identified by its handsome, straight grain that portrays a gorgeous array of colors. This unmatched beauty is enhanced by lifelong durability. Cypress wood is naturally decay and insect resistant and continues to be rated as the most durable wood in America. It has little tendency to warp, twist, or cup.

### For the do it yourselfers the maintenance and cleaning for our furniture is as follows:

Depending on your outdoor conditions you should clean the furniture monthly, with warm water and dish soap. If you have placed the furniture under trees or in a shady area, clean more frequently. Every 3 months, the furniture should be rubbed down with OUTDOOR OIL. Outdoor oil can be purchased through WoodVisions. Outdoor oil contains Linseed oil that seals and protects the wood and it also contains mildew and UV inhibitors.

We use all stainless hardware to protect and enhance the beauty of your furniture.

### For the busy homeowner,

WOODVISIONS offers an easy care furniture plan to ensure your pieces retain their natural beauty for years to come.

For an introductory offer of **\$69.95\*** WOODVISIONS will come to your home three times a year to clean and treat each piece of your furniture with a outdoor oil to protect and preserve your pieces from the outdoor elements.
